## REMARKS/ARGUMENTS

Applicants attach Replacement Sheets for changes to Figures 2 to 6 so that the reference numerals shown in therein correspond to the descriptions in the specification and claims. The changes have been described previously. No new matter has been added.

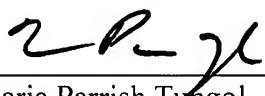

Since prosecution is closed and no other amendments may be made by Applicants, the Examiner is respectfully requested to make certain corrections in the specification and claims by Examiner's Amendment. Specifically, the term "taht" in paragraph [0052] requires correction to "that". In claim 1, last line, "26," should be inserted since 26 is the first lens referenced in the previous line.

Applicants submit that a review of the prior art of record as a whole shows that the claims in the present application meet the requirements for patentability. It is respectfully requested that the Examiner approve the Replacement Sheets and pass the application to issue.

Respectfully submitted,
